Advanced Sensors

## Renting equipment was the solution for us—not only for last minute needs.

### > PURCHASER

“Renting Validation equipment was the solution for us to avoid capital investments, but also for getting the job done.”

### > SERVICE ENGINEER

“The validation job I had to do took longer than expected; the second unit I rented from GE helped to get the process done much faster and we were able to keep downtime to a minimum.”

### > PROJECT MANAGER

“We were building up a new production area where we needed additional equipment for extra validation tasks. With the help of the rental units, we could go get the new production up and running much faster.”

### > VALIDATION SERVICE PROVIDER

“We could get a new big project from one of our customers— with additional rental equipment , we could calculate the best price and win the order.”

### > CONTRACT MANUFACTURER

“With validation and calibration equipment available for any peak demand, we were able to optimize our internal processes and our productivity.”

## Rent a complete validation system or just the equipment you need to extend your existing setup.

### EQUIPMENT AVAILABLE FOR RENT

- Wired Thermal Validation System
- Intelligent Temperature Standard for Thermal Validation & Calibration
- Dry Block Temperature Calibrations
- Wireless Thermal Validation System
- Datalogger for Temperature, Relative Humidity, Pressure
